Southland Land and Water Submission

I have concerns of the implications these changes will have on many farmers and their families. This is a large document that takes some time to understand. Many people will not be able to comprehend the implications this will have on their farming business. Many rules in this document are uneconomic and hard to manage, putting a lot of pressure on some farmers that are already stressed, due to the financial and emotional situations they find themselves in, due to low product prices. I support the primary objective of the Plan to maintain and prevent further declines in water quality.

My request is that the speed with which these changes are expected to be achieved be lengthen and you carefully consider the financial pressure that comes with new legislation.
