

1.
Thank you for giving me your time
To hear our submission, from the Environ
S/land River laison Committee
Today only relates to River
management matters, which associate
with our Annual works programme

There also is a mirror image of
- The Grant McGregor submission so well
do both together now it that ok.
523 & 753

There is Base on "The Amended
water plan 42 "A" recommendations
in track changes." E/S web page

Rule 51

Minor diversions of water

with leaving the diversion in place, allows the repair work to settle in or Take root. Then when the next flood or fresh comes it returns Back to its original course

Rule 59

Culvert & Sediment Traps

Clarification on were the
4 mtr Hight 15. measure from.
ie Culvert size etc.

ie base of stream to Top of dam
or Top of culvert To Top of dam

Rule 61.

Erosion Control Crack Willow

- # we only use existing willows
- # They can't seed up stream naturally C can only be transported by human etc.
- # They are managed under our works programme
ie spraying willows in unwanted areas.
- # Will increase the cost of erosion control majorly if stopped from using existing willows.
- # As of yet there isn't a replacement species that does the same job and available in the numbers that we need for erosion control around our Rivers & streams
- # lastly note we do not take willows in to sites that do not already have exist stock on hand.

Permitted Activities is authorize
By The E/S Plan.

discretionary Activities Give Council.
The ability To access a wide range
of matters while access a consent application

Restricted Discretionary activities, limits
The matters council considers when
accessing the application
