

Intensive winter grazing

Critical source example 1

Critical source example 2

Critical source example 3

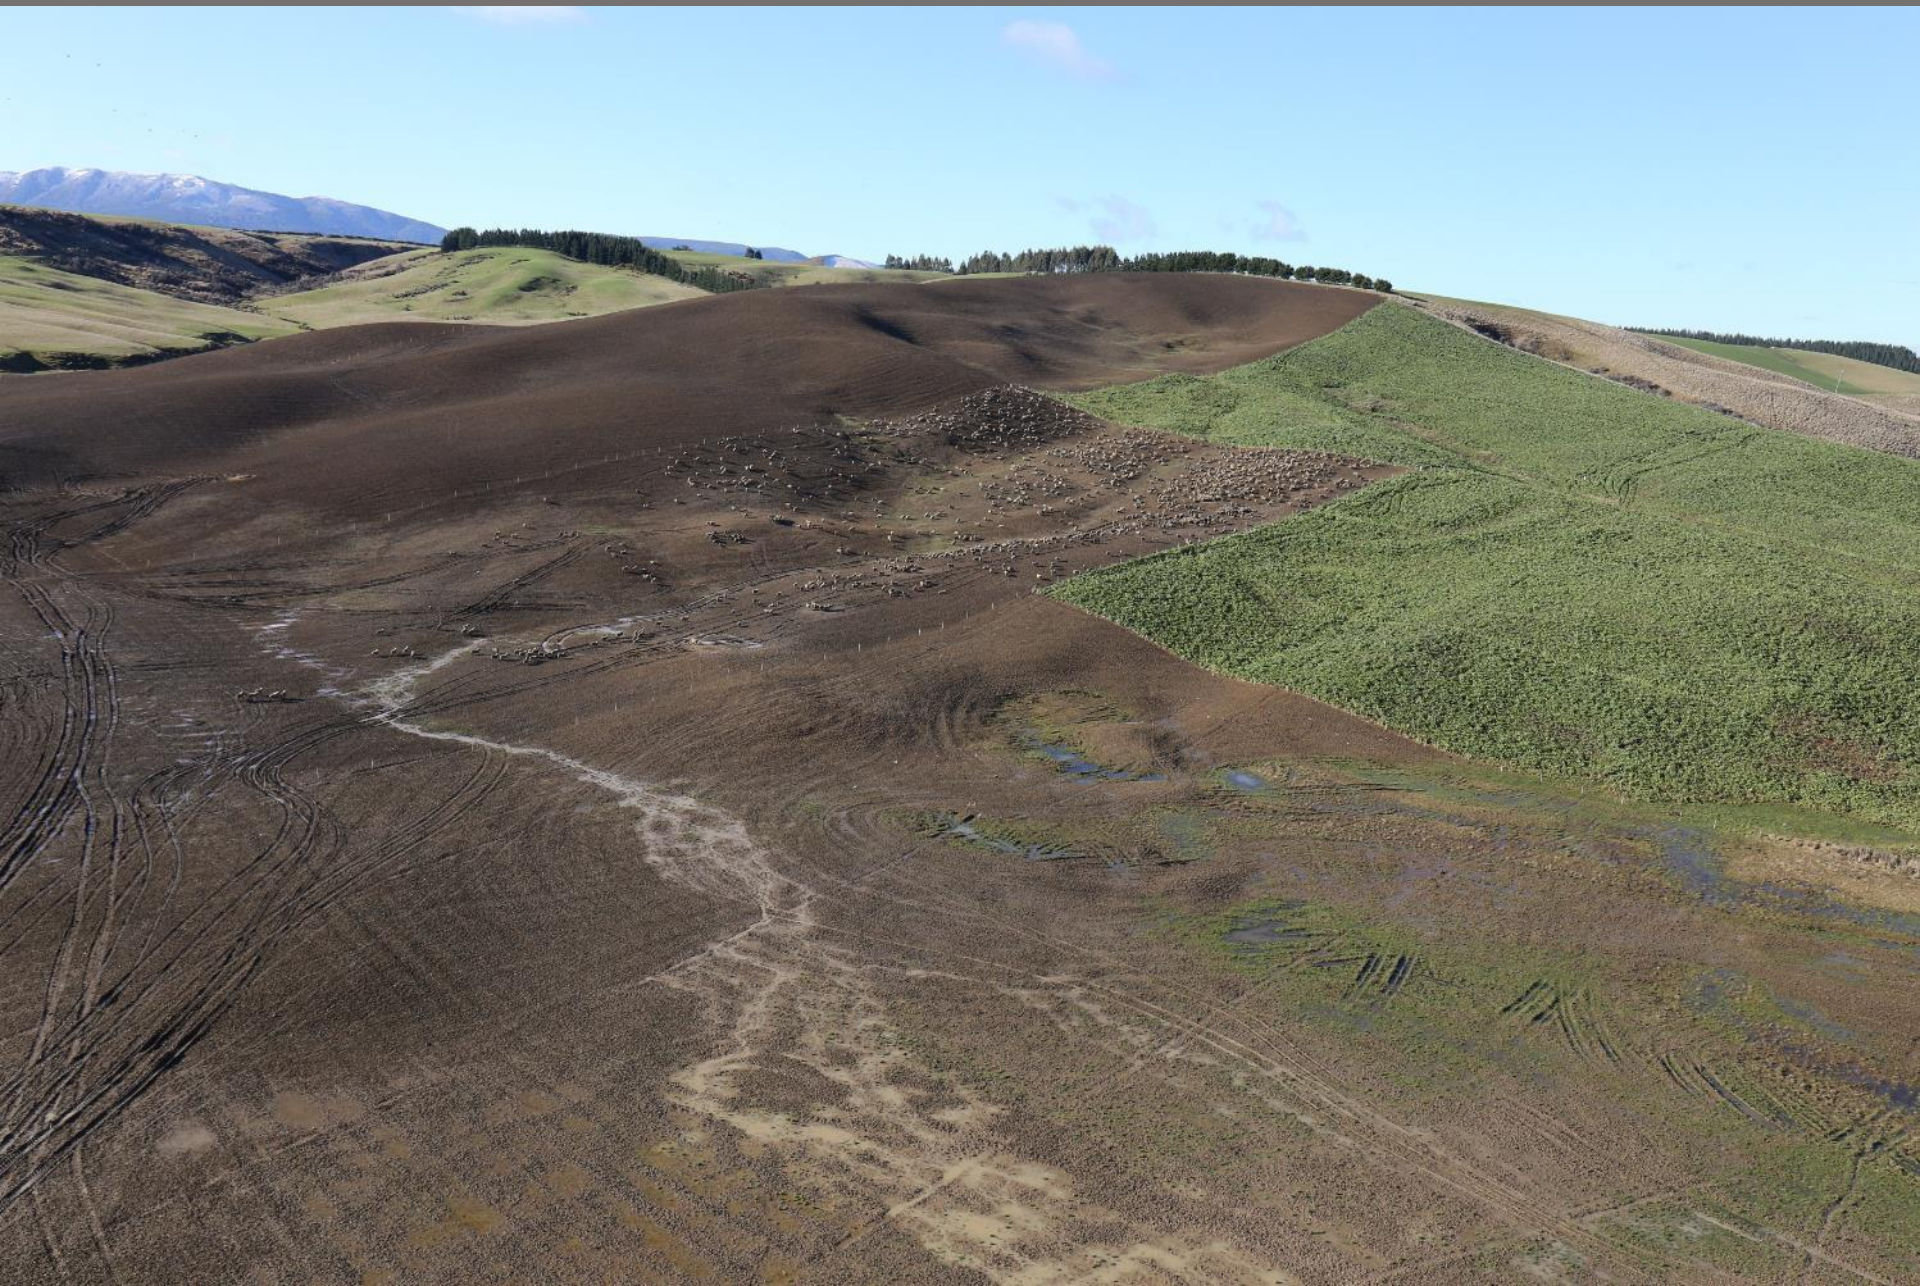

Critical source example 4

Note upstream clarity of receiving stream

Critical source example 5

Deer wintering & critical source access

Downstream
over 48hrs
after rainfall

Vegetated Buffer Strips

Need minimum 5m horizontally to be effective

Eg of a dam $>2\text{m}$ from 'bed' of tile therefore requires an engineer

Weed & sediment removal

Significant reduction in large brown trout & longfin eel
